

“**Having a healthy lifestyle includes all the things Lifestyle Assessment measures. Activity, quality of sleep, fitness and stress. If you can measure these things, then it creates much stronger results.**”

Colin Thomas
Clinical Physiologist, BMI Healthcare

Fitness Level

For the first time Lifestyle Assessment gives you an objective estimate of your Fitness Level from a single 30-minute walk. See how you compare to peers, track progress and be motivated to improve.

98% of participants recommend

A HOLISTIC APPROACH TO WELLBEING

FIRSTBEAT LIFESTYLE ASSESSMENT FOR YOU

MANAGE STRESS

- ✓ Discover your daily stress levels.
- ✓ Recognise what causes stress during your daily routine.
- ✓ Plan ways to limit negative stress in your day.

ENHANCE RECOVERY

- ✓ Uncover positive moments of recovery.
- ✓ Understand how to improve your sleep quality.
- ✓ Boost concentration, mood and performance.

EXERCISE RIGHT

- ✓ See effects of physical activity, calories burned and daily steps.
- ✓ Learn the optimal level and type of exercise for you.
- ✓ Discover your Fitness Level based on VO2max estimate.

Work, leisure and sleep: A 360-degree overview

Finding the ideal rhythm of life is important and wellbeing is influenced by every aspect of your routine. Lifestyle Assessment lets you recognise factors in your life that help, or hinder, your recovery and ability to reach maximum potential. A comprehensive overview of every area of your life - from work, to leisure, to sleep - leaves no stone unturned on the path to improved wellness.

Proof of Progress

Monitoring regularly gives you the best insight into how your body is reacting to lifestyle changes. Tracking measurements provides important feedback and the opportunity for positive reinforcement. Detailed analytics on stress, recovery, sleep and fitness help fine-tune any wellness program and help you achieve optimum results.
