

Electrodes

Ambu BlueSensor L

Good electrode in sports and recommended for use when training. The large Ambu BlueSensor L features highly conductive wet gel, offset connector and a combination of instant and long-term adhesives for excellent contact and stable signals throughout the monitoring period.

Kendall Arbo H92SG

The most used electrode in Firstbeat's own measurements. Solid gel and a small attachment area makes this electrode skin-friendly and easy to attach to the skin. No PVC-plastic involved.

Fiab F9079

Recommended for sensitive skin. Gentle adhesive and FOAM-material enhances comfort and wearability. May result in poor contact with moist and sweaty skin. PVC-free.
